

EYeoT

Internet of Things

amis

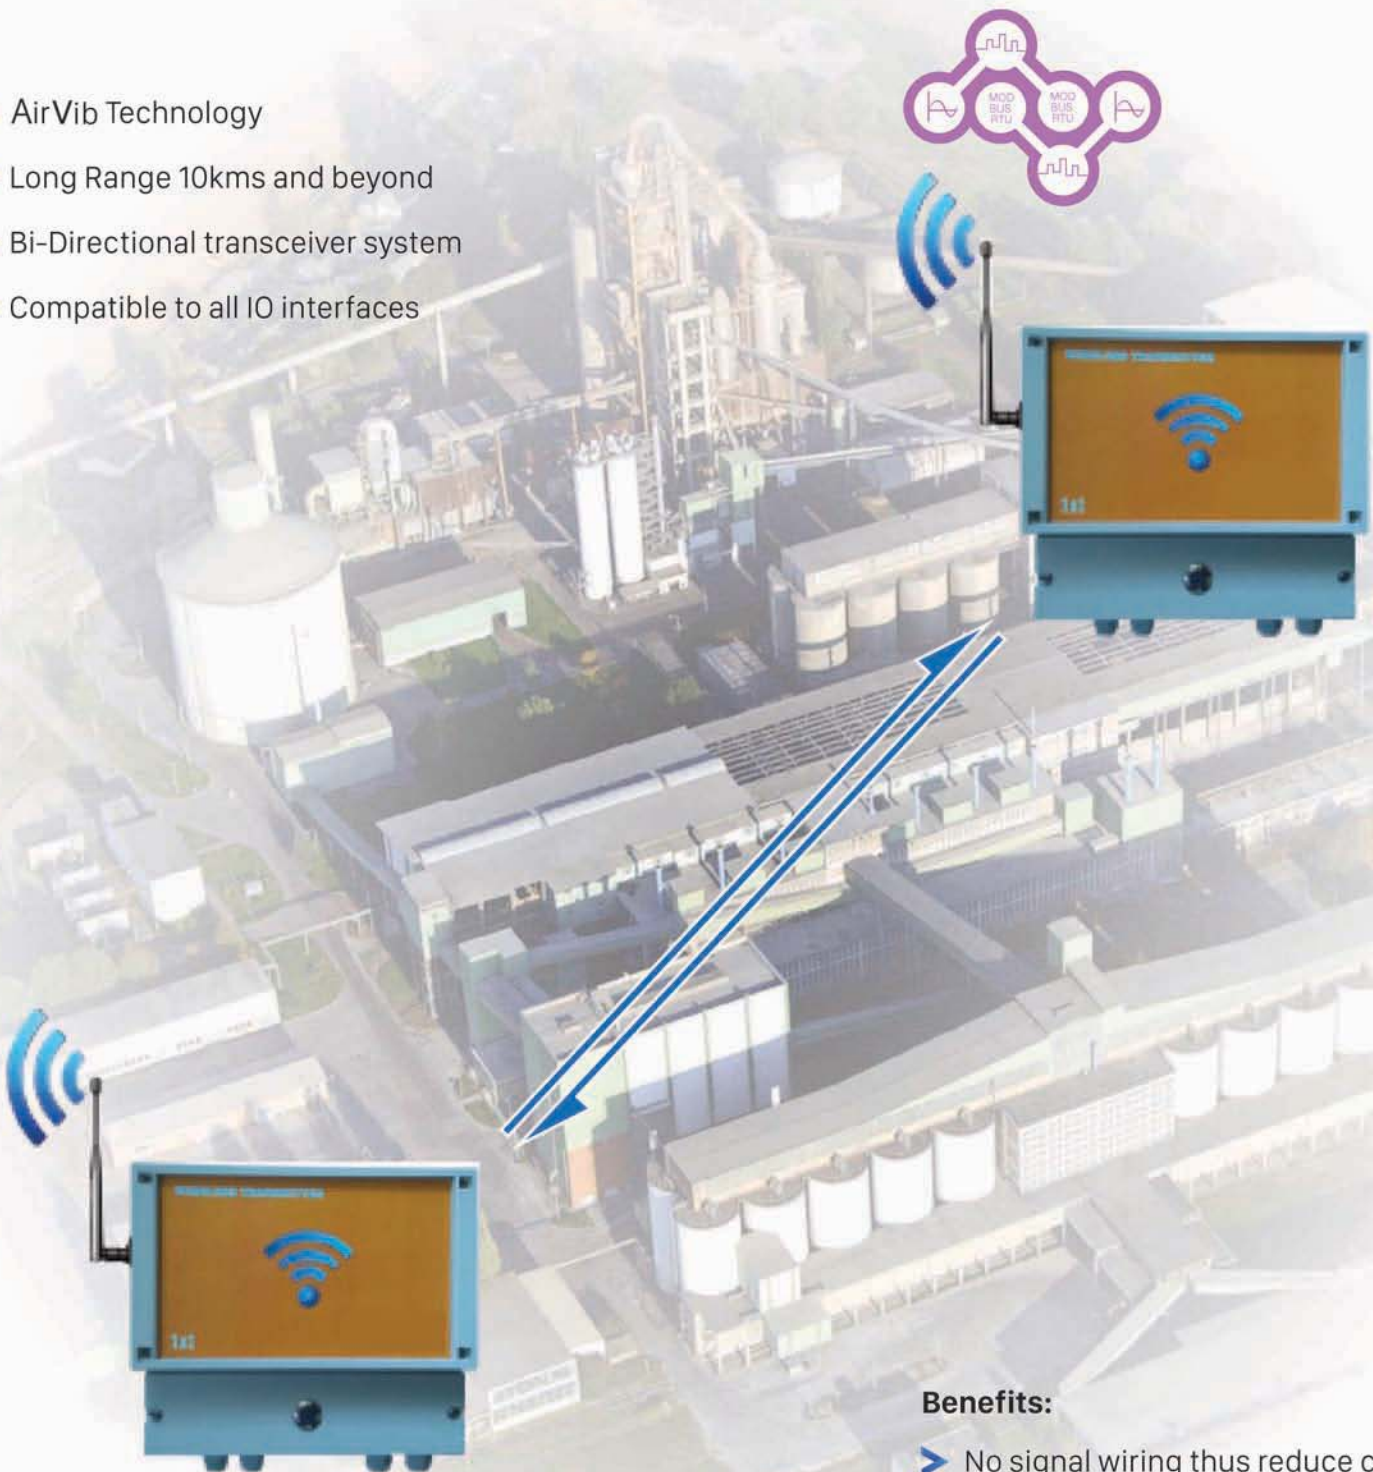

Visualise & Analyse
Any time Any Where

Free Login

- AirVib Technology
- Long Range 10kms and beyond
- Bi-Directional transceiver system
- Compatible to all IO interfaces

Benefits:

- No signal wiring thus reduce cabling and maintenance cost
- Reducing inventory on spares and field work
- Making Intelligent existing devices
- Quick Access to controls

Monitor & Control
At any distance

- > AirVib combined with GSM Technology
- > Unlimited distance coverage
- > Wireless and IoT combination of system
- > Compatible to all IO interfaces

Benefits:

- > No signal wiring thus reduce cabling and maintenance cost
- > Making Intelligent existing devices
- > Access anywhere any time
- > Android and iOS mobile compatibility

121

Bi Directional

Every Minute counts in a process Industry and wireless networks are a powerful tool boosting productivity and encouraging information sharing. Our **121 Bi-Directional** Analysers are developed using LoRa Technology which has key features of Long Range coverage and millions of nodes

EYeoT

Internet of Things

Internet of Things represents a general concept for the ability of network devices to sense and collect data from anywhere in the process. Our **EYeoT** analysers provide real- time information's and reporting systems of the process data. It accepts signal inputs like Analog , Digital , MODBUS , TCP/IP...etc more. With our **Free LOGIN** facility customer can visualise and get statistical reports analysis of data.

WIOT

Wireless with IOT

Process industries are in need of quick access of some critical process control and our **WIOT** analyzers are the perfect solution for it. Our WIOT analyzers are the combination of **121** and **EYeoT** systems. With this new WIOT system, we can transfer the data without any limitation of the distance and one can control the signal input functions from anywhere at any time. **WIOT** is the perfect solution for long distance of data transfer in the industry.

☞ SPECIFICATIONS

Frequency:

865-915 Mhz ISM frequency band

Frequency Impedance:

50 Ohm nominal

Transmitter/Receiver Code Matching:

Factory set

Wire Connection:

Terminal Blocks

Operating Power:

24Vdc or 230V AC (Optional)

Operating Temperature:

0 to 70 °C

Enclosure:

ABS Enclosure

Antennas:

Includes 5dBi Antennas

Transmit/Receive Distance (-EU Model):

Up to 1 Km Line-of-sight (With Included 5dbi Antennas)

Up to 3 Km Line-of-sight (With Optional 13dbi Antennas)

Transmit Rate (Factory Set):

Every 1 Second Receiver Specifications

Sensitivity:

- 20dBm

I/O Impedance:

50 Ohm nominal

I/O Interface:

Analog Current 4-20mA or 0-10V and 24V NPN or PNP (Optional)

No of Channel:

1- 8 CH standard , others optional

SOFTWARE OS:

Linux 1.6 - Kernel 3.14
